

*“A sound mind exists in a sound body”* that is how the proverb goes.

Accordingly, health is an important aspect in human life, and therefore it is important for us to see that all our employees maintain good health so that they can perform their normal duties efficiently and effectively, and make their earnings to support their family, and lead a comfortable life.

Cleanliness and hygiene play a vital role in maintaining normal health of the human race, or otherwise it will invite diseases causing damage to health.

Good housekeeping within the Plant is very significant and therefore, we educate our employees to maintain good housekeeping in their respective work areas, as they may be doing in their own homes; in order to provide a healthy working- environment.

Controlling/ minimizing air and sound pollution at the workplace is equally important to maintain a good and a healthy environment, everyone should understand and pay attention not to pollute the atmosphere, and therefore smoking at the workplace is prohibited.

All our employees are informed at the time of their induction about the importance of maintaining a healthy environment in their place of work.

Our Area Supervisors are instructed to ensure that the employees in their respective areas understand the concept fully well, and maintain their work areas neat and tidy after completing a given task/ at the end of their duty hours on a regular basis.

For Engineering Services International,

Paul Apackken (Paulose)

Managing Director
